

Portable Solar Binder Pack

Product Specifications

IP15B

Product Description

Innergy Power's portable solar binder pack consist of a portable, lightweight fiberglass (FRP) solar module built into a zippered, high quality binder with a shoulder strap and a 10' long cigarette lighter receptacle cord. It allows users to power/recharge such devices as cell phones and PDAs.

When the IP15B is used to recharge the Power Plant 12V, 5Ah notebook battery (IP1205), that battery can power other devices such as laptop PCs up to appx. 3.5A, portable DVD players, MP3 players, iPods, GPS units and satellite radios.

Specifications

Typical Electrical Characteristics

	IP15B
Maximum Power (Pmax)	15.4W
Voltage at Pmax (Vmp)	17.3V
Short-circuit current (Isc)	1.28A
Open-circuit voltage (Voc)	19.8V
Current Max (IPmax)	1.17A
Cell Type	Multicrystal
Substrate	FRP

Mechanical Characteristics

Dimensions	13 1/2"x 12"x 2"
Weight	2.9 lbs.

Note: Above specifications @ 1000 watts/m2 solar irradiance at 25°C

By simply unzipping the binder, laying it flat in full sun and plugging the car adapter cord into the IP15B, users can utilize solar power for added run time or recharge the device's internal battery after the sun has gone down.
